Covering membrane (C) for regeneration of tissue and/or bone has at least three layers, with a natural material for the outer layers (1, 1') and at least one intermediate layer (2) made of synthetic material. Also claimed are (1) the preparation of (C), by (a) placing a layer of natural material in a mould; (b) applying at least one layer of synthetic material; (c) applying a second layer of natural material; (d) closing the mould, transferring it to a pressure vessel, and closing the pressure vessel; (e) introducing CO₂ and/or N₂ into the pressure vessel; and (f) applying a set pressure (p) at a set temperature (T) for a set time (t); and (2) a moulding comprising (C).
